DETAILED ACTION

Response to Arguments

1. Applicants' amendments and arguments, filed on 03/10/2006 with respect to Claims 9 and 11-13 have been fully considered. The 35U.S.C. 102(b) and 103(a) rejections have been overcome by rewritten those objected claims – dependent claims in independent form including all of the limitations of the base claim and any intervening claims.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative James Murphy on 04/06/2006.

The application has been amended as follows:

- The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Insert reference 600 to Fig.6 as marked. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
- Paragraph [0032], line 2, change "604" to --- 602 ---.

In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

3. Claims 9 and 11-13 are allowed.
4. The following is an examiner's statement of reasons for allowance.
 - The prior art fails to teach an apparatus of Claim 9 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,515,526, US 5,931,891, US 5,859,605 and US 5,563,535. The improvement comprises "the digital to analog converter comprising: low pass filters for filtering said real and imaginary parts of said digital complex waveform; a rotator for rotating said real and imaginary parts of said digital complex waveform by a selected angle such that a noise shaping function of said digital to analog converter tracks a center frequency of said digital output clock; and quantizers for generating said real and imaginary parts of said analog complex waveform from rotated real and imaginary parts output from said rotator:" as recited.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ted M. Wang whose telephone number is (571) 272-3053. The examiner can normally be reached on M-F, 7:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chieh Fan can be reached on 571-272-3042. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
